

## CARBON

Super Spec Link

- HDMI 2.0 Capable | 4K | Ultra HD | 2160P | Ethernet Enabled
- High Grade OFC | Rigid Foil Shield | Gold Plated Connector
- 10.2 GBPS | 4K 30 FPS | 3D | Deep Color
- Lossless HD Audio | Auto Lip Sync
- Active with Spectra7 Technology for 10 / 12 / 15 / 20 meters

Carbon Super Spec Link was developed to beat the HDMI standard and set a new benchmark for entry level performance. Expect the Carbon Super Spec to deliver flawless pictures and sound.

### ▪ ENHANCED PIXEL DENSITY

4K ULTRA HD is four times the resolution of a 1080p display and the same resolution used by state-of-the-art Digital Cinema systems.

### ▪ EXTENDED RANGE CAPABILITY

Spectra7 Technology delivers the industry's first self-powered 'active' chip that delivers the full 4K, 10.2 GBPS with Deep Color signal at 30 FPS even above 10 meters.

### ▪ CLEARER HDMI SIGNALS

Rigid Foil Shield over Connectors helps reduce EMI from interfering with your HDMI signal.

### ▪ SUPERIOR CONNECTION

Gold plated 19 pins in the connector receptacle and connector surface ensure better signal transmission and reduced interference.

### ▪ REINFORCED AND FLEXIBLE STRAIN RELIEF

Our special attention to strengthen the strain relief with an ABS moulded shell ensures less breakage at the highest stress point of the cable.
