

JADE

Reference Link

- HDMI 2.0 Capable | 4K | Ultra HD | 2160P | Ethernet Enabled
- High Grade Solid Core Long Grain OFC | Super Grip Zinc Alloy Connector
- 10.2 GBPS | 4K 30 FPS | 3D | Deep Color
- Lossless HD Audio | Auto Lip Sync
- Active with Spectra7 Technology for 10 / 12 / 15 / 20 meters

Jade Reference Link from Entegrale was developed for the maximizer. Solid Long-Grain Copper conductors maximize the performance of HDMI - exceeding the minimum standards set by HDMI 1.4 ® .

▪ SMOOTHER AND CLEARER SOUND

Solid Core Long-Grain OFC Conductors (LGOFC) eliminate strand-interaction distortion. This results in a smoother and clearer sound than cables using regular high purity copper. Fewer oxides within the conducting material, less impurities and less grain boundaries ensure LGOFC deliver superior performance.

▪ ENHANCED PIXEL DENSITY

4K ULTRA HD is four times the resolution of a 1080p display and the same resolution used by state-of-the-art Digital Cinema systems.

▪ EXTENDED RANGE CAPABILITY

Spectra7 Technology delivers the industry's first self-powered 'active' chip that delivers the full 4K, 10.2 GBPS with Deep Color signal at 30 FPS even above 10 meters.

▪ CLEARER HDMI SIGNALS

Solid Metal Shield over Connectors drastically reduce EMI from interfering with your HDMI signal.

▪ SUPER CONNECTOR GRIP

Super Grip Zinc Alloy Connectors double the connector grip strength to nearly 10 lbs (4 kilograms) thereby eliminating the need for grip teeth that can damage HDMI receptacles.
